

# ANNOUNCEMENT

Dear EFRA, Organizers and drivers

We like to inform you that:

Due to the increments of production costs, in particular those linked to the rising prices of chemicals used in the industry, the European RC foam tires manufacturers have recently been forced to align the prices accordingly.

We would like to apologize with our customers, but we also believe this slight price increase is carried out in their interest, so that the industry's companies can keep operating serenely and providing the best possible quality for their tires.

That's why tyres prices apply from now on at the EFRA events will be:

**Euro 20 x 1 set of 1/8 scale (1 pair front + 1 pair rear)**

**Euro 12 x 1 set of 1/10 scale (1 pair front + 1 pair rear)**

Sincerely,

Cristian Boni
